

PARISH CAKE SALE IN OCTOBER IN OLD SCHOOL CAHERLINE

A Cake Sale will take place in Caherline Old School in October, to raise funds for the continued upkeep of our Churches.

Volunteers are urgently needed in all areas of our Churches to keep it alive within our Parish

It would be great to see more people involved as Eucharistic Ministers, Readers (5th Class upwards) Altar Servers, as Collectors, in Choirs, as Musicians-Music at Mass, as members of the Parish Pastoral Council, in subgroups to help with fundraising and in the preparation for Christmas, Easter and other Ceremonies. There is urgency now for us to begin to prepare for a different kind of Church within our community, one where all of us will have to assume a much more active role in developing and supporting the faith life of our Christian community. This new situation within every community calls on every person to look seriously at their own baptismal call, and to find ways in which they can actively help by using the gifts that they possess by taking the responsibility for the handing on of the faith within their own community. Contact any member of the Parish Pastoral Council, our Sacristans, or Fr. Roy Donovan if you would like to become more involved in your Church.

Annual Mass in Inch Saint Laurence Cemetery:

The annual open-air Mass for our deceased relatives and friends will be celebrated in Inch Saint Laurence Cemetery on Friday 7th August 2015 at 7.30pm. This is an opportunity to remember and pray for our faithful departed. A collection will be taken up on the night to help towards the upkeep of our cemeteries. We thank all who help maintain the graveyards to a very high standard.

Pope Francis on Climate Change June 18th, 2015

Climate change is real, and it's getting worse. "It is a global problem with grave implications: environmental, social, economic, political and for the distribution of goods. It represents one of the principal challenges facing humanity in our day" Pope Francis says.

Human beings are a major contributor to climate change. Pope Francis says- human beings do have an effect of the Earth: "We have come to see ourselves as her lords and masters, entitled to plunder her at will."

Climate change disproportionately affects the poor. Climate change's worst impact, Pope Francis says, "will probably be felt by developing countries in coming decades. Many of the poor live in areas particularly affected by phenomena related to warming, and their means of subsistence are largely dependent on natural reserves." Poor countries are often financially indebted to rich countries. The world has what Pope Francis calls a "social debt towards the poor.... because they are denied the right to a life consistent with their inalienable dignity."

We can and must make things better. Pope Francis says he doesn't believe we should be robbed of hope. "Human beings while capable of the worst are also capable of rising above themselves, choosing again what is good, and making a new start."

Individuals can help, but politicians must lead the charge. He argues that **personal** responsibility is an important step towards reversing climate change, but that political and structural transformations are needed for lasting change.

"Every effort to protect and improve our world entails profound changes in lifestyles, models of production and consumption, and the established structures of power which today govern societies." Pope Francis says his letter on care of creation, is a response by the Church to God's ancient request that we preserve, protect, and sustain creation.
